

Ahed J Alkhatib

Title: Dr.

Education: PhD from Cambell state University

Work and affiliation:

- Clinical researcher, department of forensic science and toxicology, faculty of medicine, Jordan University of Science and Technology.
- Academic secretary of sociology department, International MARIINSKAYA Academy.
- Social status: married.

- **Contact:** ahed.alkhatib64@yahoo.com
- drahedalkatib@yahoo.com
- ajalkhatib@just.edu.jo
- **Mobile no:** 00962795905145

Scientific interest: Over the time, I have published more than 130 articles in various medical fields including neurosciences, pharmacology, and diabetes. My approaches in research include the involvement of philosophy of science in research which gives looking, and thinking in depth. I have developed several hypotheses in medicine such as the role of white matter in initiating diseases such as diabetes. In microbiology, I have demonstrated that prokaryotic cells and eukaryotic cells are similar in producing cell cycle proteins which can participate in autoimmunity diseases.

Research interest: Setting medical hypotheses and writing book in different fields, of which two books have already been written and distributed in the world market.

Other interests include:

- Neurology

- Pharmacology
- Philosophy of science
- Tumor research
- Behavioral biology
- Emergency medicine

Publications:

Books:

- 1- Molecular and Physiological Roles of Estrogen Receptor**
- 2- White Matter and Disease: Does Brain have a Role in Initiating Disease**

Both of them were published by Lambert academic publishing (LAP)
